February 2017

Enabling Development

Reports to AOET

Landowners donating sites for development.
Once planning application agreed by SCDC, uplift in land value donated to the Estuary Trust.

In addition to these formal relationships, there is close co-operation between all the parties. e.g. The Implementation Group include representation from the EA and the IDB. There are also cross-memberships, the most important of which is between the AOEP and AOET. The EA has to grant Permits for any work the IDB commission and can pass funds to it as a fellow 'Flood Management Authority.'
